Junio 2022 – julio 2022

PROJECTS

This are some of the projects that i take part of and are available in my git account.

- **Video Game Creation:** creation of the video game Ralph very similar to a Mario game, it was coded in Java.
- **Web developing:** with a team of three, we created a web page for the purchase of tickets, implementing the different views of administrator users and drivers to coordinate the loading and sale of tickets. Everything was coded in Ruby on Rails.
- **Ros:** I've been working with ros in a research student scholarship, with the goal of park a boat-robot using a camera and applying machine learning .
